RULES FOR INUNCTION OF MERCURIAL OINTMENTS.

- I.—Every night take a warm bath for fifteen minutes.
- II.—Rub a piece of the ointment, as large as the last joint of the forefinger, into some part of the body every night with the palm of the hand, for a quarter of an hour.
- III.—The ointment is to be rubbed into one of the following places:—Inner side of thighs, avoiding the groins and purse; sides of chest, avoiding the hairy parts of armpits: inner surfaces of arms and forearms: buttocks; back or belly.
- IV.—Never rub into the same place two nights running.

V.—After rubbing in the ointment, leave it without washing any off until the next bath.

VI.—Clean the teeth twice a day.

VII.—Use the gargle four times a day.

DIRECTIONS FOR TREATMENT OF SCABIES WITH SULPHUR OINTMENT.

The whole body must be scrubbed with soap, hot water, and a flannel to-night. Then rub ointment into all the skin, especially where the disease is worst. Do not wash the ointment off, but let it stay on until the third morning. Then soap again before putting on clean clothes.

•All the under-clothes and bed clothes must be boiled before they are again used, or else the disease will be caught from them anew. All cloth clothes to be well baked or ironed with a scorching iron.

RULES FOR USING THE INJECTION.

- I.—Get a Glass Syringe holding about four teaspoonfuls, and having a bulbous end.
- II.—Make water, and inject some tepid water before using the Injection, to clean and clear the passage.
- III.—Inject so as to distend the urine canal, let the Injection stay in ~~half~~ ² ~~a~~ minutes do this twice each time.
- IV.—Repeat the Injection each time after making water, except at bedtime.
- V.—The Injection may be weakened by the addition of water when the discharge has ceased, and gradually discontinued.
- N.B.—Every patient must keep his person thoroughly clean by washing with soap and water every day.
